

NICHOLAS JOSEPH

Orlando, FL | LinkedIn | GitHub | Portfolio

TECHNICAL SKILLS

Front-End: React · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · JSX · Component-Based Architecture · Responsive Design

CMS & Tooling: Headless CMS (ContentStack comparable) · Figma · Git · GitHub · VS Code · Postman · Jira

Back-End / APIs: Node.js · Express.js · REST API Integration · Firebase · MongoDB · SQL · Plaid · Stripe

QA & Testing: Playwright · Selenium · Cross-Browser Testing · Cross-Device QA · End-to-End · Regression · WCAG 2.1 Accessibility · UAT

Motion / Interaction: CSS Animations · GSAP (familiar)

Methodologies: Agile · Scrum · CI/CD · SDLC · AI-Assisted Development

PROFESSIONAL EXPERIENCE

Software Developer / Front-End Engineer *June 2025 – Present*

Esseva Technologies | Remote

- Build pixel-perfect, responsive web applications and reusable UI components using React and TypeScript, translating Figma designs into production-ready HTML/CSS interfaces.
- Deliver accessible, WCAG-compliant front-end implementations across healthcare and research platforms, covering desktop and mobile breakpoints.
- Integrate third-party and internal REST APIs to power data-driven application features and dashboards.
- Leverage AI tools daily to accelerate production velocity, improve code quality, and streamline debugging workflows — aligned with an AI-first engineering culture.
- Collaborate in Agile sprints with designers, stakeholders, and engineers; communicate production status and blockers proactively.
- Capybara Medical Trial Platform — Built patient- and admin-facing interfaces including onboarding workflows, participant dashboards, and reporting tools; implemented secure API integrations for trial data management.
- Public Research Finder — Developed a research discovery platform with advanced React search/filter interfaces and external API integrations, optimized for performance and usability.

Flutter Developer *June 2024 – June 2025*

Logride | Orlando, FL

- Designed, tested, and deployed features for enterprise-grade mobile applications, ensuring functional alignment and reliability.
- Created and executed test cases for new features, validated results against requirements, and documented defects for resolution.
- Collaborated with Agile teams, contributing to sprint planning, daily stand-ups, and release readiness verification.
- Assisted in automation readiness by designing test scenarios suitable for future automation integration.

Software Development Engineer in Test (SDET) *June 2023 – June 2024*

Savana | Remote

- Developed and maintained automated test suites in Playwright and TypeScript for fintech and banking applications.
- Performed rigorous cross-browser, cross-device, and regression testing across multiple environments before each release cycle.
- Validated API integrations, transaction workflows, and customer-facing interfaces in a regulated financial services environment.
- Reduced manual testing effort through automation frameworks; supported UAT and release validation initiatives.
- Collaborated with engineering teams in Agile ceremonies to investigate defects, refine backlogs, and improve coverage.

Software Developer *May 2021 – June 2024*

LunaDev | Remote

- Designed and developed client-facing web applications using React, JavaScript, HTML5, and CSS3 for startup and small business clients.
- Integrated APIs and backend services; performed end-to-end testing, debugging, and deployment support.
- Assisted with Flutter mobile application development within Agile/Git workflows.

SELECTED PROJECTS

Financial Data Integration Platform — *React · Node.js · Plaid · Stripe*

- Built secure financial data integrations using Plaid and Stripe APIs, including authentication flows, transaction dashboards, and account management.

Automated Testing Framework — *Playwright · TypeScript*

- Engineered reusable automated test suites for web applications, reducing manual regression effort and improving pre-release confidence.

Personal Portfolio Website — *React · TypeScript · Node.js · Express*

- Designed and developed a responsive portfolio site with reusable React components, API integrations, and cross-device compatibility.
