Professional Experience

Software Development Engineer in Test

Savana | Orlando, FL | May 2023 – December 2023

- Conducted detailed testing, validation, and documentation reviews for financial technology systems in a fast-paced environment.
- Investigated and resolved workflow discrepancies while ensuring compliance with operational procedures and internal standards.
- Worked cross-functionally with internal teams to support process accuracy, system reliability, and issue resolution.
- Utilized analytical problem-solving skills to identify operational risks and improve efficiency.
- Leveraged AI-assisted tools to accelerate testing workflows, documentation review, and troubleshooting processes.

Software Engineer

LunaDev | Orlando, FL | January 2021 – May 2023

- Managed detailed application workflows and customer-facing functionality while maintaining high standards of accuracy and operational efficiency.
- Collaborated with clients and stakeholders to resolve issues, document requirements, and improve user experience.
- Maintained organized records, tracked project deliverables, and adapted quickly to changing priorities.
- Created automation solutions and internal tools using Excel Macros and software scripting to streamline repetitive tasks.
- Demonstrated strong communication and customer service skills when coordinating project updates and resolving technical concerns.

Flutter Developer

LogRide | Remote | December 2023 – Present

- Support application development and operational workflows in a collaborative, fast-moving environment.
- Analyze system behaviors, troubleshoot issues, and maintain detailed documentation for internal processes.
- Utilize AI-powered development tools to improve efficiency, automate repetitive tasks, and optimize workflow management.
- Coordinate with cross-functional teams to ensure high-quality customer experiences and process consistency.
